RE: Amateur license KR4UQ Club Call Signs; Case # EB-2005-2711

Dear Mr. Amato:

On February 16, 2005, we notified you that our licensing records indicate that you have at least 17 club call signs in your name as trustee, all licensed to Virginia RACES clubs. We requested information related to the club stations and have reviewed the information you provided in various responses over the past two years.

Although the number of such club licenses appears more than necessary, we have accepted your responses. You are reminded that the only types of station licenses that can be granted in the Amateur Service are shown in Section 97.5 of our rules. Moreover, Section 97.17(a) provides that only a "person" is eligible to apply for a new operator/primary station, club station or military recreation station license grant." There are no provisions for the licensing of not-for-profit corporations.

Additionally, in view of the fact that the above licenses are for club stations listing you as trustee, and were granted as club stations, you are responsible for the proper control of each station, and each club must at all times be composed of at least four persons, have a name, document of organization, management, and a primary purpose devoted to Amateur activities consistent with Section 97 of our rules.

You may be periodically requested to document that these club stations comply with the above rules.

Sincerely,

W. Riley Hollingsworth
Special Counsel
